EZ-Claim Application

A TRAVEL AND EXPENSE MANAGEMENT SOLUTION

- Does your organization have a cumbersome expense management process?
- Do you find monthly travel and expense claims of employees difficult to manage?
- Do you get confused with the whole process of claiming your reimbursements?
- Do you feel the need of having a better claim approval system in place?

From employees to managers to finance executives, almost everyone finds the manual process of managing expenses tedious. The process of filing the claim, getting it approved and validating the same manually is tiresome and time consuming.

It's Paperless, Fast and Convenient

How does this affect an organization?

Inefficient

Manually managing the claims, approvals and disbursements consume time and hence, employee productivity goes down.

No visibility on employee spends

Lack of a consolidated view of employee expenses prevent a clear understanding of how much is being spent and where while travelling.

Lack of clarity on company policy compliance

Manual filing creates a lot of discrepancies in records and it is hard to track whether company policies are being followed.

Inconvenient process

There is no central platform that takes care of the whole claiming mechanism in an organization, making the whole process cumbersome across the board.

How does it benefit you?

Employees:

Takes 50% less time to submit, approve and reimburse, when compared to manual systems.
